

April 22, 1988

Mr. Uri Inbal
Materials Laboratory
Massachusetts Port Authority
Ten Park Plaza-Room 3710
Boston, MA 02116

Dear Uri;

I am writing this letter to thank you for the outstanding job that you have done for the Massachusetts Port Authority during the two and one-half years you have been here.

As a Materials Engineer who directed our laboratory's efforts, you provided the quality assurance in support of our construction efforts which involved soils, concrete and asphalt. Your efforts, including professional judgements and managerial activities, were a key element in the success of more than \$30,000,000 of construction placement. Examples are the Roller Compacted Concrete Terminal Yards at Conley and Moran and several of the Logan International Airport's runways, taxiways and aprons.

Because you performed your basic responsibilities so well, we asked you, in addition, to be the Resident Engineer on other Massport jobs. Your work on the Tobin Bridge Community Project and the Logan Highway Improvements Project was characterized by professionalism and excellence.

We at the Authority will miss you but know that you will have great success with your new position in California, directing the automated production of concrete products. All in the Department join me in wishing you and Aida and the children the best.

Sincerely,

George P. Johnson
Director of Engineering
